

21 January 1965

MEMORANDUM FOR THE RECORD

SUBJECT: Trip Report for 11 January 1965

25X1

1. On 11 January [redacted] visited to discuss their proposals to build a vacuum easel for the [redacted] Enlarger. Representatives at both concerns first signed our patent disclosure then our invention was explained and demonstrated to them [redacted] thought that they could complete their proposal by 22 January. Photogrammetry said they would finish their's by 25 January. The proposals will be submitted through normal channels.

2. [redacted] requested a visit to NPIC to see the enlarger, but they were told that this would not be possible until their clearances are completed. The uncleared people know with whom they are dealing because an unclassified request for proposal for a modification of the [redacted] enlarger's film transport was sent to them by the Office of Logistics.

25X1

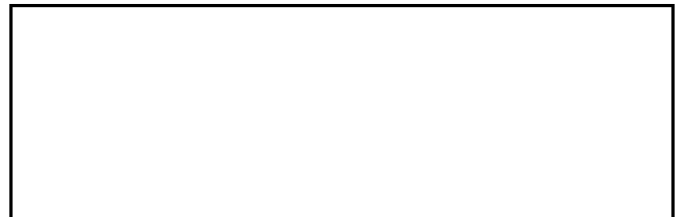

3. Photogrammetry requested that they be supplied with the information on the thickness of the present easel and the free distance between the easel and the support.

25X1

4. The subject of variable ratio anamorphic eyepieces was discussed [redacted] and they would like to study the problem and see if they can develop a unique approach.
